Professional Summary

Software Developer with experience building production-grade full-stack web applications using AWS, Agile, Azure, Java, NoSQL, REST APIs, Spring, Spring Boot. Experienced in API development, dashboard workflows, production debugging, CI/CD pipelines, and Agile delivery.

Professional Experience

Brillio Technologies Pvt Limited

Software Developer | April 2024 – Present | Bengaluru

- Developed and maintained production-grade full-stack web application features using Java, Spring Boot, REST APIs, ReactJS, JavaScript, TypeScript, HTML, CSS, and SQL.
- Built and enhanced dashboard workflows covering catalog, checkout, user management, admin reporting, inventory control, and revenue visualization.
- Migrated and refactored APIs across multiple repositories to improve maintainability, scalability, and integration consistency.
- Implemented URL migration, redirection, and API split changes to support platform performance and reliability.
- Debugged frontend and backend issues across application workflows, improving stability and user experience.
- Worked with AWS, Docker, Jenkins, GitHub, and CI/CD workflows to support build, deployment, and delivery.

Sage Global Services Limited

Developer | 26 August – 7 January

- Performed manual, functional, internal, and regression testing for enterprise application workflows.
- Reproduced backlog defects and documented test scenarios to support issue resolution.
- Collaborated with stakeholders and participated in Agile ceremonies to validate expected behavior.
